As a diligent, fast learner, and resourceful IT graduate, I am an excellent candidate for an IT company seeking to I possess a good problem-solving ability and can readily adapt to new technology. I also approach tasks with a sense of responsibility. I am enthusiastic about taking on challenges and applying my skills and knowledge to any given situation. Moreover, I am proficient in React development.

EXPERIENCE

Frontend Engineer
Rara Labs

Manbhawan, Lalitpur
Jul, 2024 - Present

- Assisted in managing accounting operations, invoicing, and financial reporting
- Developed and integrated AI-powered features for scanning and extracting data from images of bills and quotations, enhancing user experience and data accuracy.
- Collaborated with cross-functional teams to integrate advanced AI models, including GPT Mini, Gemini AI, and Claude AI, into frontend applications for real-time image recognition and automated data processing.
- Worked closely with backend engineers to ensure smooth API integrations for AI model calls, improving data flow and user interaction.
- Familiar with inventory management, IRD integration, and POS systems
- Proficient in utilizing accounting tools to streamline business processes and ensure compliance with financial regulations, improving accuracy and efficiency in financial tasks.
- Developed workflows to automate invoicing and billing, reducing manual entry errors and saving time.
- Migrated Tigg application CRA to vite

Mid-level React Developer
Waft Technology

Lalitpur, Jwagal
Mar, 2023 - Jun, 2024

- Led the integration of user behavior analytics tools such as Microsoft Clarity and Google Analytics, enabling the team to gather actionable insights on user interactions, improving overall user experience
- Skilled in utilizing UI component libraries such as Mantine UI and Chakra UI to enhance user interface design and development
- Developed and implemented backend CRUD operations using Node.js and Express.js, enabling efficient data management and seamless interaction with the database.
- Worked on Agile methodologies, particularly SCRUM framework, to guide software development processes in alignment with business requirements
- Worked as a React developer where I worked on Waft-Engine (Open Source Platform) and Waft- CRM
- Experienced in integrating diverse payment gateways, both domestic and international, to enable secure online transactions within web applications (Acleda Bank Pay, khalti, and eSewa)
- Converting clients' business requirement documents into project shipment schedules by dividing them into epics and tickets for streamlined implementation and monitoring
- Refactoring the React project into various versions to optimize performance.

Mid-level React Developer|EXL (Resource outsource from Wafttech))
Waft Technology

Lalitpur, Jwagal
Jul, 2023 - Dec, 2023

- Designed and implemented the frontend interface using React.js, allowing users to upload PDF documents and submit search queries relating to the document uploaded
- Developed and optimized file upload functionalities, ensuring secure, scalable, and high-performance file handling through AWS S3.
- Engaging in discussions after client meetings to thoroughly analyze task division and establish appropriate time constraints based on their requirements
- Successfully delivered the demo project within the specified timeline, meeting all functional requirements
- Engaged in multiple projects, effectively maintaining codebase to meet project requirements.

Junior React Developer

Waft Technology

Lalitpur, Jwagal

Mar, 2022 - Mar, 2023

- Building reusable components on React
- Worked as front-end developing product in Next Js 13 (Waft-commerce, Opendatafabric) and (io-fund) in Next js 12 for SSR
- Proficient in Tailwind CSS and Bootstrap for efficient and responsive styling of web applications
- Integration of user behavior analytics tool (Microsoft Clarity and Google Analytics)
- Additionally, skilled in utilizing UI component libraries such as Mantine UI and Chakra UI to enhance user interface design and development
- Experienced in state management using Redux and Redux Saga, as well as leveraging Redux Toolkit for streamlined development workflows.

Internship React

Axios Softwork

Banepa, Bhaktapur

Dec, 2021 - Feb, 2022

- Worked as a React developer intern where I worked on their Customer Relation Management project (Axios CRM)
